

Oracle ilearning quiz answers section 3 answers pdf 2017

I'm not a robot!

Oracle learning quiz answers section 3 answers pdf 2017

You're Reading a Free Preview Page 3 is not shown in this preview. (Answer all questions in this section) 1. The PLAYERS table contains these columns: You must display the player name, team id, and salary for players whose salary is in the range from 25000 through 100000 and whose team id is in the range of 1200 through 1500. The results must be sorted by team id from lowest to highest and then further sorted by salary from highest to lowest. Which statement should you use to display the desired result? SELECT last_name, first_name, team_id, salary WHERE salary BETWEEN 25000 AND 100000 AND team_id BETWEEN 1200 AND 1500 ORDER BY team_id DESC, salary DESC; 2. SELECT last_name, first_name, team_id, salary WHERE salary > 24999.99 AND salary < 100000 AND team_id BETWEEN 1200 AND 1500 ORDER BY team_id ASC, salary DESC; 3. Evaluate this SQL statement: SELECT e.employee_id, e.last_name, e.first_name, m.manager_id FROM employees e, employees m ORDER BY e.last_name, e.first_name WHERE e.employee_id = m.manager_id; This statement fails when executed. Which change will correct the problem? Remove the table aliases in the WHERE clause. Reorder the clauses in the query. (*) Remove the table aliases in the ORDER BY clause. 4. Will the following statement return one row? SELECT MAX(salary), MIN(salary), AVG(salary). No, it is illegal. You cannot use more than one multi-row function in a SELECT statement. Remove the table aliases in the WHERE clause. Yes, it will return the highest salary, the lowest salary, and the average salary from all employees. (*) Yes, it will return the highest salary from each employee. Yes, it will return the average salary from the employees table. 5. The function COUNT is a single row function. True or False? Mark for Review 5. The EMPLOYEES table contains these columns: Compare these two SQL statements: SELECT DISTINCT department_id DEPT, last_name, first_name, SELECT department_id DEPT, last_name. Which columns can be added to the ORDER BY clause in the following SELECT statement? (Choose Three) SELECT first_name, last_name, salary, hire_date. (Choose all correct answers) last_name, first_name (*). Any column in the EMPLOYEES table, any expression in the SELECT list or any ALIAS in the SELECT list. (*) All the columns in the database. All columns in the EMPLOYEES table. (*) The table name, EMPLOYEES, which would then automatically sort by all columns in the table. 7. Which SELECT statement should you use to limit the display of product information to those products with a price of less than 50? Mark for Review SELECT product_id, product_name. (*) Evaluate this SQL statement: SELECT product_id, product_name, price ORDER BY product_name, price; What occurs when the statement is executed? The results are sorted alphabetically and then numerically. (*) The results are sorted numerically and then alphabetically. The results are sorted alphabetically only. 9. Evaluate this SELECT statement: SELECT last_name, first_name, salary. How will the results of this query be sorted? The results will be sorted ascending by LAST_NAME and FIRST_NAME only. The database will display the rows in whatever order it finds it in the database, so no particular order. (*) The results will be sorted ascending by LAST_NAME, FIRST_NAME, and SALARY. 10. Evaluate this SELECT statement: Which operator is the equivalent of the OR conditions used in this SELECT statement? 11. From left to right, what is the correct order of Precedence? Mark for Review Arithmetic, Concatenation, Comparison, OR (*). Arithmetic, NOT, Logical, Comparison. Arithmetical, NOT, Concatenation, Logical. 12. What will be the results of the following select? WHERE last_name NOT LIKE 'A%' AND last_name NOT LIKE 'B%' No rows will be returned. There is a syntax error. All last names that begin with A or B. (*) All last names that do not begin with A or B. (*) All rows will be returned. 13. Will the following SELECT statement return one row? SELECT first_name, last_name, email. The rows will be sorted alphabetically by the FIRST_NAME and then the LAST_NAME values. The rows will be sorted in reverse alphabetical order by the LAST_NAME column only. 14. Evaluate this SELECT statement: SELECT last_name, first_name, email. If the EMAIL column contains null values, which statement is true? Null email values will be displayed first in the result. Null email values will not be displayed. 15. Which comparison condition means "Less Than or Equal To"? Mark for Review WHERE "Category" = 5570 (*). SELECT product_id "Product Number", category_id "Category", price "Price" ORDER BY "Product Number"; This statement fails when executed. Which clause contains a syntax error? WHERE "Category" = 5570 (*). SELECT product_id "Product Number", category_id "Category", price "Price" ORDER BY "Product Number"; 16. You attempt to query the database with this SQL statement: SELECT product_id "Product Number", category_id "Category", price "Price" ORDER BY "Product Number"; This statement fails when executed. Which clause contains a syntax error? WHERE "Category" = 5570 (*). SELECT product_id "Product Number", category_id "Category", price "Price" ORDER BY "Product Number"; 17. Evaluate this SELECT statement: SELECT first_name, last_name, email. Defaults to an ascending order (ASC) (*). Evaluate this SELECT statement: SELECT first_name, last_name, email. The rows will be sorted alphabetically by the FIRST_NAME and then the LAST_NAME values. The rows will be sorted in reverse alphabetical order by the LAST_NAME column only. 18. Evaluate this SELECT statement: SELECT last_name, first_name, email. Defaults to an ascending order (ASC) (*). Evaluate this SELECT statement: SELECT last_name, first_name, email. The rows will be sorted alphabetically by the FIRST_NAME and then the LAST_NAME values. The rows will be sorted in reverse alphabetical order by the LAST_NAME column only. 19. Evaluate this SELECT statement: SELECT last_name, first_name, email. Defaults to an ascending order (ASC) (*). Evaluate this SELECT statement: SELECT last_name, first_name, email. The rows will be sorted alphabetically by the FIRST_NAME and then the LAST_NAME values. The rows will be sorted in reverse alphabetical order by the LAST_NAME column only. 20. The following statement represents a multi-row function. True or False? Mark for Review 11. Which of the following statements best describes the rules of precedence when using SQL? Mark for Review The order in which the columns are displayed. The order in which the expressions are evaluated and calculated. (*) The order in which the expressions are evaluated. 21. Which of the following best describes the meaning of the LIKE operator? Mark for Review Match a character pattern. (*) To test for values in a list. Display rows based on a range of values. 13. Which statement about the ORDER BY clause is true? Mark for Review You can use a column alias in the ORDER BY clause. (*) The default sort order of the ORDER BY clause is descending. The ORDER BY clause can only contain columns that are included in the SELECT list. The ORDER BY clause should immediately precede the FROM clause in a SELECT statement. 14. From left to right, what is the correct order of Precedence? Mark for Review Arithmetic, NOT, Logical, Comparison. Arithmetical, NOT, Logical, Comparison. Arithmetical, Concatenation, Comparison, OR (*). 15. The function COUNT is a single row function. True or False? Mark for Review 2. The PLAYERS table contains these columns: You want to display all players' names with position 6900 or greater. You want the players names to be displayed alphabetically by last name and then by first name. Which statement should you use to achieve the required results? SELECT last_name, first_name WHERE position_id >= 6900 ORDER BY last_name, first_name; SELECT last_name, first_name WHERE position_id >= 6900 ORDER BY last_name, first_name, team_id, salary WHERE salary > 24999.99 AND salary < 100000.01 AND team_id BETWEEN 1200 AND 1500 ORDER BY team_id DESC, salary DESC; 6. Which statement about the ORDER BY clause is true? Mark for Review The ORDER BY clause can only contain columns that are included in the SELECT list. You can use a column alias in the ORDER BY clause. (*) The default sort order of the ORDER BY clause is descending. The ORDER BY clause should immediately precede the FROM clause in a SELECT statement. 7. Which of the following best describes the meaning of the LIKE operator? Mark for Review Match a character pattern. (*) Display rows based on a range of values. To test for values in a list. 8. Which of the following are TRUE regarding the logical AND operator? Mark for Review TRUE AND FALSE return FALSE (*). TRUE AND TRUE return TRUE. FALSE AND TRUE return NULL. 9. Which statement about the default sort order is true? Mark for Review Character values are displayed in reverse alphabetical order. The logical AND operator is TRUE AND FALSE return FALSE (*). All last names that begin with 'A' or 'B'. All last names that do not begin with A or B. (*) No rows will be returned. There is a syntax error. All rows will be returned. 11. Evaluate this SELECT statement: SELECT employee_id, last_name, first_name, salary WHERE last_name NOT LIKE 'A%' AND last_name NOT LIKE 'B%' All last names that begin with 'A' or 'B'. All last names that do not begin with A or B. (*) No rows will be returned. 12. Which of the following is true of the ORDER BY clause? (Choose Two) Mark for Review (Choose all correct answers) Defaults to an ascending order (ASC) (*). Must be the last clause of the SQL statement. (*) Defaults to a descending order (DESC). Displays the fetched rows in no particular order. 13. A column alias can be specified in an ORDER BY Clause. True or False? Mark for Review 14. Evaluate this SELECT statement: SELECT last_name, first_name, email. If the EMAIL column contains null values, which statement is true? Null email values will be displayed last in the result. 15. You attempt to query the database with this SQL statement: SELECT product_id "Product Number", category_id "Category", price "Price" ORDER BY "Product Number"; This statement fails when executed. Which clause contains a syntax error? WHERE "Category" = 5570 (*). ORDER BY "Product Number"; SELECT product_id "Product Number", category_id "Category", price "Price" ORDER BY "Product Number"; 16. The purpose of an ERD is to document the proposed system and facilitate discussion and understanding of the requirements captured by the developer. True or False? Mark for Review (1 Points) True (*). False 2. A well structured ERD will show only some parts of the finished data model. You should never try to model the entire system in one diagram, no matter how small the diagram might be. True or False? Mark for Review (1 Points) True. 17. Given the following descriptions of the employees and jobs tables, which of the following scripts will display each employee's possible minimum and maximum salaries based on their job title? EMPLOYEES Table: Name Null? Type EMPLOYEE_ID NOT NULL NUMBER(6) FIRST_NAME VARCHAR2(20) LAST_NAME NOT NULL VARCHAR2(25) EMAIL NOT NULL VARCHAR2(25) PHONE NUMBER NUMBER(10) SALARY NUMBER(8,2) COMMISSION_PCT NUMBER(2,2) MANAGER_ID NUMBER(6) DEPARTMENT_ID NUMBER(4) JOBS Table: Name Null? Type JOB_ID NOT NULL VARCHAR2(10) JOB_TITLE NOT NULL VARCHAR2(35) MIN_SALARY Section 1 Quiz (Answer all questions in this section) 1. A specialized type of software, which controls and manages the hardware in a computer system. Mark for Review (1 Points) Operating System (*) Hardware Software Client 2. Personal computers (PCs) have been in existence since 1950. True or False? Mark for Review (1 Points) True. False (*). 3. The overall mission of the Oracle Corporation is to use the internet and fast processing servers to build its own network. Mark for Review (1 Points) True. False (*). 4. Users could directly interact with which of the following software to access essential business applications? (Choose three) Mark for Review (1 Points) (Choose all correct answers)
